

PSC
Flooring Ltd.
industrial flooring contractor

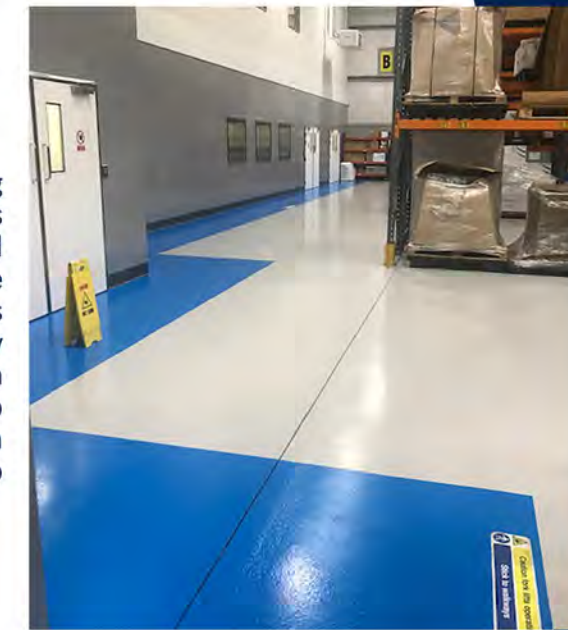

Resin floor systems

delivered on time, on budget and on spec

PSC Flooring Ltd are industrial flooring experts, operating throughout the UK, with over 30 years' experience in the application of resin floors, polyurethane flooring and epoxy floor coatings. We offer a total flooring contractor package encompassing site survey, specification, surface preparation & product installation. Working throughout the UK, for the Automotive, Areospace, Food & Drink,

pharmaceutical, engineering, warehousing and vehicle workshop Industries as well as for commercial ventures, we understand your facility cannot spare much downtime and needs flooring installation to be as swift as possible. We take care of every aspect of your flooring installation, from your first enquiry to follow-up maintenance, delivering every project on time, on budget and precisely to specification.

safeguard the workplace

Anti-slip flooring is typically used where hardwearing durable surfaces are required that need to be able to withstand heavy/continuous traffic or where substances/liquids are regularly spilled or present. Application of a non slip resin is the obvious choice for increased safety and manageability, not to mention it offers you value for money as it will last years longer than many other flooring systems.

With staff and visitor safety high on the priority list, the clear demarcation of the walkways and zebra crossings by shutter doorways, loading bays etc gives clear indication of safe areas within the work place. With a variety of colours available a highly visible safety yellow is usually recommended for demarcation lines so as to ensure awareness for staff and visitors of pit falls such as a dramatic change in level to meet Health and Safety Executive guidelines.

Versatile flooring solutions for your Business needs

what can resin do for you??

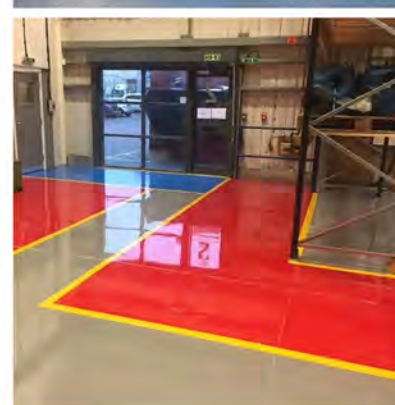

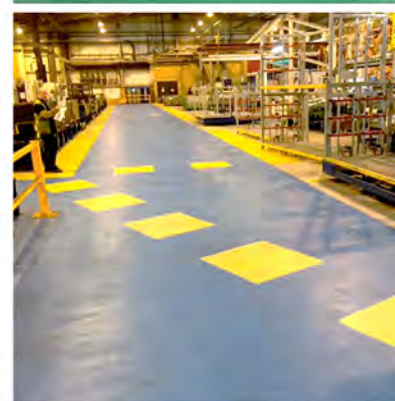

the complete package

Our complete industrial flooring package includes the following services:

- Site surveys & specification
- Surface preparation by vacuum shot blasting & diamond grinding
- Resin flooring systems including epoxy floor coatings, screeds and anti-slip systems
- Heavy-duty polyurethane resin flooring screeds
- Heavy-duty cementations pump screeds

automotive & areospace

PSC Flooring Ltd have provided resin flooring solutions to the automotive and aerospace industries for many years to leading companies such as GKN, Eaton Aerospace, Lander Automotive, ZF Lemforder, IAC Group, Gestamp and Auto Turned Parts to name some. Requirements usually include chemical and oil resistant, hygienic, easy to clean, durable, hard wearing, scratch resistant and colour coded for trucking gangways and walkways to meet the latest Health and Safety Guidelines. Polyurethane screeds are recommended to produce a heavy duty, matt, anti skid surface which is proof against almost everything including steel wheeled traffic and substantial impact and abrasion.

pharmaceutical

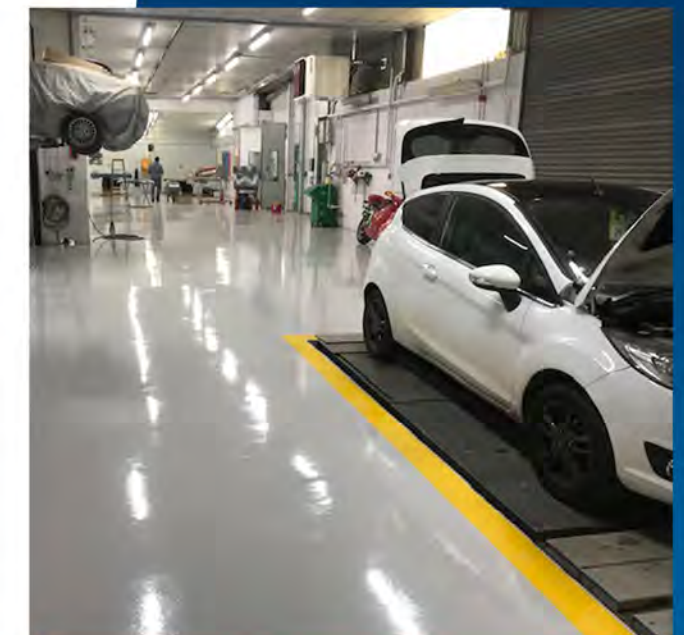

High gloss flooring tends to be favoured with the pharmaceutical industry to achieve the clean, clinical environment required. Epoxy resin floors are ideal for this clinical look as they are high gloss, hard wearing and easy to clean. At PSC we are used to working with specific client requirements such as requiring dust to be kept to a minimum and hence can specify the correct products for the job.

warehousing & engineering

Warehouse and engineering flooring needs to be hard wearing to withstand constant fork lift and pallet truck use whilst also being resistant to impact, abrasion, chemical and heat damage, slip resistance, impact resistance and flatness. As industry specialists, PSC Flooring Ltd fully understand the need for warehouses to remain operational as its difficult for them to fully close, so they can offer out of hours and phased work programmes to help clients refurbish their floors.

vehicle workshops

Working with major car dealerships including Toyota, Peugeot, Ford, Land Rover, Vauxhall, Seat, Hyundai and Mercedes as well as independents, PSC Flooring understand that most modern vehicle workshop floors need to be attractive, high gloss, hard wearing, seamless, easy to clean and give high standards of protection against spillages of grease, oil and diesel. Vehicle workshop epoxy resin is available in a wide range of colours making it ideal for adding demarcation lines and chevrons for MOT bays and around inspection pits.

food & drink

Hygiene, safety and longevity are amongst the most important factors when selecting any new floor surface for a the food and drinks industry. Working closely with manufactureres, both large scale and micro, PSC flooring understands the industries needs when choosing the correct floor. Unlike other manufacturing sectors, floors can be subject to extremes of heat, so must be thermal shock resistant. Polyurethane RT and HR resin can be steam cleaned up to 120 degrees which will kill any harmful bacteria but will not affect the integrity of the resin floor. Resin screeds are also seamless hence ideal for industries where cleanliness and hygiene levels are required to be very high.

Speak to our team

If you would like some advice on our range of flooring options, or help with any other product or service we offer, call now on 01562 702 047 and speak to one of our friendly and experienced team members.

flexible flooring solutions for your Business needs

commercial

Commercial spaces are usually high traffic and require frequent cleaning due to this. At PSC Flooring we have installed a range of commercial floors ranging from smaller businesses such as hair dressers right the way through to large exhibition spaces. Whatever the requirements for the space we understand that the area will need precise attention to detail and must be extremely flat.

transformation

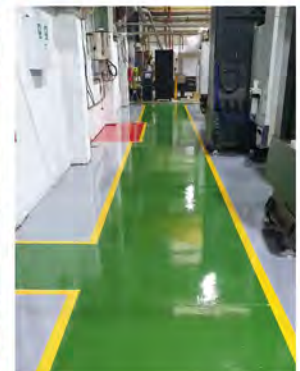

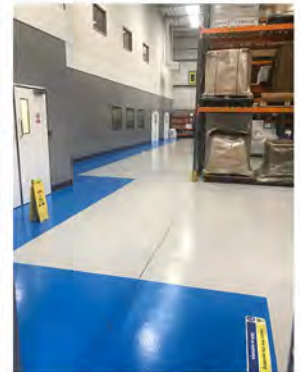

New flooring can transform the work space see our before and after examples below:

Safe Contractor approved

Have peace of mind that PSC Flooring Ltd has the relevant processes and documents in place to comply with health and safety legislation. Achieving Safe Contractor accreditation demonstrates our commitment to health and safety and ensures we remain up to date year on year.

our products

- **Floor surface preparation**
Shotblasting, grinding and repairs - ensuring the floor is prepared ready to accept the coats to be applied.
- **Anti-slip resin flooring**
the ideal floor resin to have if your work environment involves people or vehicles moving around.
- **Cementitious Pump Screeds**
the fast-track solution to ensuring flooring is fit-for-use as soon as possible - quick turn around time.
- **Epoxy Resin Coatings and Screeds**
perfect for use across a range of industries - varying thicknesses for medium to heavy duty usage
- **Polyurethane Coatings and Screeds**
designed to provide heavy-duty resistance to abrasion, chemical attack and other physical aggression.
- **High Build Coatings**
provides a tough, hard wearing coating for medium duty traffic giving high film build and wear resistance - Ideal for food preparation, laboratory, warehouse, production and general factory flooring.
- **Food Hygiene and Pharmaceutical Grade Flooring**
Hard wearing, seamless, impervious and non-porous so it does not support microbial growth - meeting environment health requirements.
